

1                                   **ABSTRACT OF THE DISCLOSURE**

2

3                   A bandana device for use by a vehicle rider  
4   wearing a helmet, to protect against dust impingement  
5   on the face, whereby when the bandana is applied to the  
6   wearer's face and the corners are brought together at  
7   the rear of the wearer's neck and below the lowermost  
8   rear edge of the helmet, the components are then  
9   positioned to be pressed together to retain the bandana  
10   tensioned over the wearer's face, and to exclude  
11   entrance of dust and dirt beneath the bandana.
